

Transportation Permits Policy Memorandum

Subject: Super Single Tire Size

Date: July 3, 2000

Policy: TPPM 2000-6

Objective

To allow haulers to substitute the metric equivalent of an 18-inch cross section super single in the place of dual tires.

Existing Documentation

The following source contains information related to this subject:

Transportation Permits Manual (TPM)

Chapter 3 – Vehicle Qualification and Inspection

Section 302.1 – Minimum Vehicle Size

Super singles of a minimum size of 18 x 19.5 are an acceptable substitute for dual tires.

Transportation Permit Manual Changes

- 1) Replace the above sentence from Section 302.1 with the following:

“Super single tires of a minimum size of 18” x 19.5” are an acceptable substitute for dual tires. The metric equivalent cross section width of 445mm is also acceptable. Tires marked by the manufacturer with a 17.5” cross section width will be treated as 18” tires.”
